

# MASCO SWEEPERS – L 3000 RUNWAY SWEEPER

800.345.1246 [WWW.MASCOSWEEPERS.COM](http://WWW.MASCOSWEEPERS.COM)

Thank you for inquiring about our ProSweep L-3000. This is amazing sweeper designed to sweep airport runways and apron area. This sweeper has no motor. When the wheels turn, it turns the main broom and the optional curb brooms. This sweeper is fast and very efficient. It is able to sweep rocks, 1" washers, sand and most any metal objects, FOD, from your airport runway from 8 to 30 mph. It will even sweep up a 6" crescent wrench at 25 miles an hour! Please review the attachments of information, specifications, references of airport usage all over the world both in military application and civil aviation.

Amazingly this sweeper can sweep a runway clean of FOD for a fraction of the cost of a truck mount sweeper. Because there is no engine, fuel, or oil the operational cost are a minimum, not to mention the ease of use by the driver. This sweeper can be easily pulled by any pick-up truck, tug or airport vehicle.

We sell this sweeper direct. We have manufactured this sweeper for more than 30 years and have sold it all over the world. This sweeper is used by more the 20 different countries military Air Force operations sweeping runway throughout the world. Private airports and airlines use this sweeper everywhere. We are very proud of the reputation this sweeper has as one of the most effective airport maintenance equipment on the market today. Thank you again for your interest.
